Office of Community Engagement to Advance Research and Community Health (CEARCH)  
Community Health Collaborative Pilot Grant

2020 Request for Letters of Interest (LOIs)

Purpose
The University of Minnesota’s Clinical and Translational Science Institute (CTSI) Office of Community Engagement to Advance Research and Community Health (CEARCH) seeks proposals for this cycle of the Community Health Collaborative Pilot Grant.

The Community Health Collaborative Pilot Grant supports community-university pilot research projects that address important health issues identified by Minnesota communities. Awards are designed to lead to health improvements while building and sustaining long-term partnerships between University of Minnesota researchers and community representatives, including nonprofits, healthcare providers, and community advocates.

Applications that address the intersection of COVID-19, structural racism and health disparities are encouraged. Applications that address the intersection of COVID-19 and rural health or aging are also encouraged.

Activities
1. Respond to health issues identified by Minnesota communities impacted by health disparities (e.g., Black, Indigenous, and People of Color (BIPOC), LGBTQ+ communities, socioeconomically disadvantaged populations, and disability communities)
2. Have the potential to increase health equity in Minnesota
3. Represent meaningful collaboration between community and University partners, with the goal of developing sustainable relationships

Funding and Timeline
CTSI anticipates funding up to four proposals with a maximum award of $50,000. Research projects must be designed to complete all data collection and analysis within 18 months of initiation of funding and must include plans for community-based dissemination and scientific publication. For examples of previously funded projects, see the past grantees on the CEARCH website.

Eligibility and Partnership
Community Health Collaborative Pilot grants must be co-led by a community organization and University of Minnesota (UMN) faculty researcher. LOIs may be submitted by either community organizations or faculty without a partner, but full proposals must include joint leadership from both:
1. A Minnesota-based community organization, such as a nonprofit organization, local public health department, healthcare organization, neighborhood association, community clinic, or tribal government.
2. A UMN faculty researcher (Assistant, Associate or Full Professor, or a PhD Research Associate) from any campus (Twin Cities, Rochester, Duluth, Morris, Crookston)

Partner Matching
CEARCH staff can assist in matching community organizations with UMN researchers. Potential applicants seeking a research partner are encouraged to notify CEARCH at cearch@umn.edu as soon as possible to request assistance with identifying a partner.

Reissued: August 2020
Application Process
A brief letter of interest (LOI) is the first step in the application process. LOIs will be accepted from community organizations, academic researchers or both. Instructions for preparing and submitting an LOI are provided below. LOIs will be reviewed by a panel of community leaders and University faculty. LOIs that align with proposal priorities will be invited to submit full proposals. Instructions for preparing and submitting a full proposal are available here.

Application Timeline
Pre-application webinar Thursday, September 10, 2020
LOIs due Thursday, October 8, 2020
Full proposal invites sent Thursday, October 29, 2020
Full proposals due Thursday, December 17, 2020
Funding announcements Tuesday, February 23, 2021
Funding period Mar 1, 2020 - Aug 30, 2021

LOI Instructions
Please address each question listed below. Limit 150 words per question:

1. **Health issue/Priority:** What health issue or priority does this project propose to address?
2. **Significance and Relevance:** Why is this health issue significant and relevant to your community or your partner’s community? How does this project address a health disparity or seek to improve health equity?
3. **Research Question(s):** What research question(s) will your project address?
4. **Methods:** What methods will be used to address your research question(s)?
5. **Strengths and Partnership:**
   a. For partners applying together: What strengths will each partner bring to the proposed project?
   b. For community or University leads seeking partners: What strengths do you bring to this project? What strengths or skills are you seeking in a partner?
6. **Impact:** Describe potential benefits of this project to the community.
7. **Dissemination:** How will you share your results with the community?
8. **Resources for Proposal Preparation**

Proposal Resources
CEARCH will host a pre-application webinar on Friday, September 11, 2020 to provide more information on this pilot grant opportunity. If you are interested, please register via web form. CEARCH has also prepared a FAQ with answers to commonly asked questions about the grant. For resources on developing research partnerships and conducting community-engaged research, please consult the CEARCH website. In addition, CEARCH staff members can provide consultation on proposal preparation.

Reporting
Award recipients are expected to submit a final report on project activities, accomplishments and challenges, and participant satisfaction. A final report form will be sent to project leads at the end of the project's funding period. This information will be used by the Cearch Management Council to determine and report on how well these awards help to meet community identified needs and foster University engagement with communities.

**Apply:** To apply, visit: [https://z.umn.edu/pilotgrant2020](https://z.umn.edu/pilotgrant2020)  **Contact:** For questions, email cearch@umn.edu
