# Examples of Multidisciplinary Teams

## Pre-Clinical Bench Research

<table>
<thead>
<tr>
<th>Mentee and Project Title</th>
<th>Mentoring Team</th>
</tr>
</thead>
</table>
| Zohar Sachs, MD, PhD | David Largaespada, PhD, Pediatrics-HOT, Medical School  
*Scientific direction, oversight, expertise in mouse models of cancer, expertise in leukemia biology. Career guidance* |
| **Medicine-HOT, Medical School**  
*The role of rifampin in treatment of left ventricular assist device driveline infections* | Jeff Miller, MD, Medicine-HOT, Medical School  
*Expertise in leukemia biology, expertise in translational research, expertise in the use of primary human tissues for basic research studies. Career guidance* |
|  | Yen-Yi Ho, PhD, Biostatistics, School of Public Health  
*Biostatistics* |

## Clinical Research

<table>
<thead>
<tr>
<th>Mentee and Project Title</th>
<th>Mentoring Team</th>
</tr>
</thead>
</table>
| Allyson Hart, MD | Ajay Israni, MD, HCMC/Epi and Community Health, School of Public Health  
*Solid organ transplantation, epidemiology. Career guidance* |
| **Medicine-Renal, Medical School**  
*Creating a Decision Aid to Improve Informed Treatment Decisions for Kidney Transplant Candidates* | Melissa Partin, PhD, VAMC/Medical School  
*Implementation of best practices, patient education, shared decision making and decision aids, behavioral interventions* |
|  | Marilyn Bruin, PhD, Design, Housing and Apparel, College of Design  
*Qualitative research design and analysis, family and social science, biographical narratives, disparities* |
|  | John Connett, PhD, Biostatistics, School of Public Health  
*Biostatistics* |

## Community Based Participatory Research (CBPR)

<table>
<thead>
<tr>
<th>Mentee and Project Title</th>
<th>Mentoring Team</th>
</tr>
</thead>
</table>
| Rebecca Shlafer, PhD, MPH | Michael Resnick, PhD, Pediatrics, Medical School  
*Public health, risk and protective factors, adolescent health, parent-child connectedness. Career guidance* |
| **Pediatrics, Medical School**  
*Incarcerated Parents in Minnesota and their Minor Children* | Julie Poehlmann, PhD Human Ecology, UW-Madison  
*Developmental child psychology, parental incarceration, resilience in high-risk children and families, parent-child relationships among infants and young children* |
Grant Duwe, MN Department of Corrections, Research Criminology, sociology, recidivism, correctional health
John Connett, PhD, Biostatistics, School of Public Health Biostatistics, pilot studies

### Big Data/Epidemiology

<table>
<thead>
<tr>
<th>Mentee and Project Title</th>
<th>Mentoring Team</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anna Prizment, PhD, Epidemiology and Community Health, School of Public Health <em>Eosinophil biomarkers and colorectal cancer</em></td>
<td>Timothy Church, PhD, Environmental Health Sciences, School of Public Health Designing and conducting large epidemiological studies on colorectal cancer, statistical analysis. Career guidance Heath Nelson, PhD, MPH, Epidemiology and Community Health, School of Public Health Analysis of genetic and immune biomarkers in tissue and blood in the study on cancer incidence and mortality Srirama Rao, MS, PhD, Medicine – PACCS and Vet Med Research Program College of Veterinary Medicine Providing expertise on the role of eosinophils and other immune cells in human cancer</td>
</tr>
