“Missed Opportunities in Cancer Prevention: Decreasing Disparities in HPV-Associated Cancers and HPV Vaccination Utilization”

Presented by: Oscar W. Garza, MBA, PhD
Assistant Professor, Pharmaceutical Care and Health

Dr. Oscar Garza is an Assistant Professor in the Department of Pharmaceutical Care and Health Systems at the University of Minnesota. He received his doctorate from the University of Iowa in Pharmaceutical Socioeconomics. Dr. Garza’s work has been related to international and rural health infrastructure development, built upon a global health oriented training and experience working with rural communities in Latin America. His program of research is focused on the economic, historical, institutional, and socio-cultural determinants of global health and health policy; and how they shape our approaches to improving health care through community health research. Dr. Garza’s specific research emphasis is concerned with health and health care disparities among rural and urban medically underserved populations, with a particular interest in access to and utilization of medical and pharmaceutical care services; and ultimately the medication experience.
