Center for Health Equity
Works in Progress

Tuesday, January 28th, 1:00pm – 2:00pm - lunch provided
717 Delaware, Room 105
RSVP: jodz0001@umn.edu

The January WIP session will be held as a journal club. Please join us as we discuss an article recently published in *Nursing Research and Practice* entitled,

“**A Framework to Examine the Role of Epigenetics in Health Disparities among Native Americans**”

Please consider the follow questions while reading the above article, these questions will be used during the discussion.

1. How does this study link adverse childhood experiences (ACE’s) to health disparities in reservation based Native American populations?
2. What additional studies could be done to better understand the mechanisms of ACE’s on health and well-being?
3. What other factors contribute to health disparities in reservation based Native Americans and how can these issues be addressed?

Works in Progress is a monthly seminar series devoted to discussing minority health and health disparities research topics. The purpose of these seminars is to give researchers a forum to freely discuss their research while still in the developing or formative phases in order to exchange ideas, obtain constructive feedback, and discuss issues that may be common to various projects (e.g., study design issues, recruitment strategies). The goal is to provide an opportunity for researchers with differing backgrounds and expertise but a shared passion for reducing health disparities to sit together and discuss their work.

Works in Progress is sponsored by the University of Minnesota Center for Health Equity (CHE). To present your research project or idea at a future seminar, please contact Megan Hoffman at 612-626-4120 or hoff0511@umn.edu

This seminar is supported in part by a grant from the National Institute on Minority Health and Health Disparities (1P60MD003422) to the University of Minnesota Center for Health Equity.
