UNIVERSITY OF MINNESOTA
Center for Health Equity
Works in Progress

Tuesday, November 27, 2012
717 Delaware Building
Room 105
1:00pm – 2:00pm (Lunch Provided)
*please RSVP to park0607@umn.edu*

“mHealth: Closing the Gap Between Diabetes Patients in Underserved Populations and Care Providers”

Presented by:

Saif Khairat

Dr. Saif Khairat earned his PhD in Health Informatics at the Informatics Institute at the University of Missouri. During his master’s degree in Computer Science, he designed and developed a clinical content tracking system by bridging Database Management Systems and web applications. Dr. Khairat’s research focuses on the areas of patient safety and medical errors by closely studying human processes and human-computer interactions.

Works in Progress is a monthly seminar series devoted to discussing minority health and health disparities research topics. The purpose of these seminars is to give researchers a forum to freely discuss their research while still in the developing or formative phases in order to exchange ideas, obtain constructive feedback, and discuss issues that may be common to various projects (e.g., study design issues, recruitment strategies). The goal is to provide an opportunity for researchers with differing backgrounds and expertise but a shared passion for reducing health disparities to sit together and discuss their work.

Works in Progress is sponsored by the University of Minnesota Center for Health Equity (CHE). To present your research project or idea at a future seminar, please contact Amy Shanafelt at 612-626-6796 or park0607@umn.edu.

This seminar is supported in part by a grant from the National Institute on Minority Health and Health Disparities (1P60MD003422) to the University of Minnesota Center for Health Equity
