Dr. Tracie Collins is the Chair of the Department of Preventive Medicine and Public Health and Kansas Health Foundation Distinguished Professor at the University of Kansas at Wichita. She was a faculty member at Baylor College of Medicine and in 2006 joined the faculty of the University of Minnesota as an Associate Professor of Medicine. She served for five years on the NIH Behavioral Medicine: Interventions and Outcomes Study Section and continued her clinical research in peripheral arterial disease serving as a PI on an American Diabetes Association funded trial to address the role of home-based walking for patients with peripheral arterial disease. Additionally, she served as co-investigator on an NIH multi-site study titled “Claudication: Exercise versus Endoluminal Revascularization.” She was the Co-Director of the Center for Health Equity’s Research Core and is currently funded on a five-year NIH RO1 to determine the role of counseling to promote walking in African Americans with peripheral arterial disease.

Funding provided in part by a grant from the National Institute on Minority Health and Health Disparities (1P60MD003422) to the University of Minnesota Center for Health Equity and by 1UL1RR033183 (PI Blazar) from the National Center for Research Resources to the University of Minnesota Clinical and Translational Science Institute (CTSI).
