717 Delaware St. SE, Room 412

“Scaling up Tobacco Cessation Services in Primary Care: Lessons learned from a RCT in India”

Raj Mohan Panda, MD, MPH
Senior Public Health Specialist
Public Health Foundation of India

Dr. Raj Mohan Panda is a Public Health Physician currently serving as Senior Public Health Specialist at the Public Health Foundation of India. Dr. Panda trained in Global Health at Emory University, has a certificate in Global Tobacco Control Leadership Program from the Institute for Global Tobacco Control, JHSPH, 2013 and is currently pursuing a career development fellowship in public health leadership and implementation science at Emory. He has led reviews of the National Health Mission on universal health care and tobacco control in national and international forums and has been keynote speaker and panelist at several national workshops on tobacco control including as co-chair of abstract committee of the International Conference on Public Health Priorities in the 21st Century: The Endgame for Tobacco, New Delhi, 2013. He has led several large projects in the mainstreaming of tobacco control into health and developmental programs and was instrumental in successfully establishing tobacco cessation clinics in several districts in India with the support of local health departments.

Funding provided in part by a grant from the National Institute on Minority Health and Health Disparities (1P60MD003422) to the University of Minnesota Center for Health Equity and by 1UL1RR033183 (PI Blazar) from the National Center for Research Resources to the University of Minnesota Clinical and Translational Science Institute (CTSI). The views expressed by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services.
